

NOE QUEZADA

Backend Developer

+52 624 175 1162 | quezadanoe@gmail.com | linkedin.com/in/noe-ixmak-quezada | github.com/GodNoden

PROFESSIONAL SUMMARY

Backend Developer with 4+ years of experience designing and maintaining scalable APIs and services with Java and Spring Boot. Experienced in SQL databases, serverless architecture, and AWS deployment.

TECHNICAL SKILLS

Languages: Java, TypeScript, Bash, PHP

Frameworks: Spring Boot, Laravel

Databases: PostgreSQL, MySQL

Cloud / DevOps: AWS (Lambda, CloudFormation, Cloudwatch), Docker, CI/CD, Azure

Tools: Git, Jira, Postman, Linux/Ubuntu

PROFESSIONAL EXPERIENCE

Backend Developer | [TekChoice, LLC](#)

Jun 2024 – Present

- Collaborated with a U.S. credit union's technical team using the internal Symitar tool, holding daily client meetings to gather requirements and translate them into technical stories.
- Designed and implemented 6+ serverless Lambda functions for a self-service portal, enabling clients to request loan deferments online instead of visiting a branch, consuming data from the Fiserv–DNA banking core system.
- Applied infrastructure as code on AWS using CloudFormation and configured monitoring alerts with CloudWatch, improving system observability.

Backend Developer Jr. | [DXC Technology Company](#)

Sep 2023 – Jun 2024

- Developed backend features in Java and Spring Boot for Grupo Bimbo, one of the country's largest bakery companies, replacing a legacy catalog and inventory system and building REST APIs under a layered architecture (Controller–Service–Repository).
- Refactored the data layer, removing DTOs that duplicated information already present in the entities and consolidating data access through models, simplifying the codebase and reducing maintenance complexity.
- Wrote unit tests with JUnit to ensure the quality and stability of the new module, reducing regression risk during the migration.

Software Developer Jr. | [Folio3 Software Inc.](#)

Aug 2022 – Apr 2023

- Fixed bugs and implemented new features under Scrum methodology and the MVC pattern, within a team of 5+ developers.
- Wrote technical documentation and unit tests for each release, ensuring continuous integration with the existing CI/CD pipeline.
- Maintained and developed a REST API using an ORM for a platform serving FDA-regulated companies.

PROJECTS

Personal Portfolio — www.ixmak.com

- Site listing and documenting all my personal projects.

EDUCATION

B.S. in Computer Systems Engineering

2018 – 2023

Universidad de Guadalajara – CUCEI | Guadalajara, Mexico

LANGUAGES

Spanish – Native | English – B2 | French – B1
